What's New at SEAPARC Leisure Complex

COVID-19 Mask and Vaccination Requirement Update

Throughout the COVID-19 pandemic, SEAPARC has followed the guidelines and orders set out by the Provincial Health Office and other governing bodies including WorkSafeBC, Island Health, British Columbia Recreation and Parks Association (BCRPA), and the Lifesaving Society.

As we continue to follow orders from the PHO, proof of vaccination with government issued ID is required for the following:

- Indoor fitness/yoga classes (12 years and older)
- Weight room access (Restricted to 15 years and older. 13 years+ who have taken the Regional Weight Room Orientation course may attend)
- Indoor adult sport participation (22 years and older) – pickleball, family hockey, etc.
- Indoor adult sport rentals (22 years and older) – hockey

According to the PHO we must ensure those utilizing select facilities/programs have received at least the first dose of the COVID-19 vaccine, and that as of October 24th, 2021 have received the second dose at least 7 days prior.

Proof of vaccination is **not required** for:

- Pool usage including aquafit, swim lessons and lap swimming
- Youth indoor sport participants (21 years and under)
- Outdoor sports or gatherings
- Parents of youth programs to drop off, support, participate or watch **(spectator limits to be determined)**
- General facility access/use such as washrooms, changerooms and showers
- Adult recreation programs under 50 person capacity (art)
- Out of school care programs
- Skating Programs and lessons

We are currently seeking clarification on how the health order applies to spectators in the facility and will update this information as soon as possible.

Additionally, patrons must wear a mask in common and public areas (including hallways, washrooms and change rooms) when not engaged in physical activity. This mask requirement applies to those 12 years and older, regardless of vaccination status.

According to PHO we must ensure those entering our facilities have received at least the first dose of the COVID vaccine, and that as of October 24th, 2021 have received the second dose at least 7 days prior.

Please plan ahead and bring proof of vaccination, government-issued photo ID if 19 years and older, a mask, and allow extra time for you visit to accommodate these changes.

Please continue to follow the health guidelines of practicing careful social contact.
