

BMHA ATOM REPORT 2016/2017

The 2016/2017 Atom season began with evaluations for the Atom League Teams in mid October. Three teams were drafted and each began league play in late October. Two teams competed in the STEP League and one competed in the HiWay 14 League. All 3 teams did well in the regular season and one of the teams in the STEP League played in the league championship against Meadow Lake.

After evaluations for the league teams, the remaining players were drafted onto three house teams. Efforts were made by the coaches to make the teams as equal as possible. These 3 house teams played against each other for the majority of the season. All 3 teams also entered into tournaments and performed well.

The BMHA Atom House Tournament took place in early February. In total, 12 teams participated in this two-day event. We received several compliments for hosting such a well-organized and fun tournament.

Overall, it was a great season due to the efforts of the coaches and the commitment from the parents and players. I was very fortunate to have the opportunity to work with such a great group of coaches and parents all season long.

Mike Humenny
BMHA Atom Director
