MINOR HOCKEY CONCUSSION BASELINE TESTING

A vital component of concussion management involves obtaining a baseline test.

Baseline testing is essential for athletes at risk of concussive injury as it provides an important point of reference when managing head injury and determining readiness to return-to-play.

Our baseline testing is done by Physical Therapists trained in concussion diagnosis and management. The testing assesses skills that are often impaired by concussion using a neurocognitive screen (ImPACT), as well as a visual screen and balance assessment.

The testing takes approximately one hour and is an important tool in concussion diagnosis, management and return-to-play decisions.

Call us today (or book online) to book your Concussion Baseline Test or email alliep@clearwaterphysio.com for more information.
