

*Storm Creek Longbow  
by Wild Rose Bows*

*The Storm Creek model is a reflex - deflex design particularly well known for smooth shooting characteristics and high energy storage, often times exceeding speeds of recurve bows. The Storm Creek also incorporates a pistol grip handle which allows shooting in a normal wrist alignment, unlike more straight grip longbows which require a flat low wrist grip.*

*"You are sure to be pleased with a new Storm Creek longbow by Wild Rose Bows!" - Tucker Grose*
