## **2. Statement on Club Licensing Policy**

The Club Licensing Policy is designed to guide member associations toward the best principles for organizational development both on and off the field. An effective program will have numerous benefits for member associations and Baseball Nova Scotia as a whole.

A Club Licensing Policy will provide protection to current member associations in good standing with the PSO, while also allowing for an annual reporting process. The licensing system would require each club to apply for membership each year by submitting basic information, as well as an update on the programming being offered within the Club. Through this reporting, gaps will be identified, and strategies can be developed to address them.

## **3. Benefits to Clubs**

- Approved clubs will receive recognition as the official BNS licensed baseball program in their designated geographic area.
- Only Licensed Clubs will have access to BNS membership privileges as outlined in the Baseball Nova Scotia Handbook.
- New clubs will not be permitted to become licensed if a Licensed Club exists in that geographic area and is offering similar programming.
- The program would assist associations in developing a succession/transition plan when there's leadership turnover.
- Assist associations in assessing their current status and comparing it to best practices in amateur sport.
- Templates for policies and procedures would become more readily available for associations addressing current gaps.
- As SafeSport requirements becomes mandatory at the club level, the Licensing process will streamline support efforts.
- Create synergy between associations and BNS.
- Allow Baseball Nova Scotia to have a more accurate and official inventory of programming being run by member associations.
- Assist association leaders in understanding roles as Board members.
- Provide additional clarity on BNS supports and services (insurance, grassroots programming, etc.)
- Better systems in addressing umpire gaps and creating strategies for recruitment and retention.
