

March 10 , 2025

Upon initial registration, female players may select whether they will play on a female team or on a mixed team (registration stream). Effective September 1 each hockey season, the registration stream will be locked and no changes shall be permitted. Thereafter, female players will not be allowed to voluntarily switch their registration stream. Where registration numbers require, BMHA reserves the right to request and change the registration stream of a player.

Further, where a female player chose to tryout for a mixed AA team and does not make that team, the player will be registered to play on a mixed team at the appropriate level. Alternately, if a female player tries out for a female AA team and does not make that team, the player shall be registered on a female team at the appropriate level.

A female player registered in the mixed stream will be drafted to a team from the entire pool of players as outlined by BMHA bylaws, rules or policies; female players shall not be chosen for mixed teams as a group or unit.
