

Player Evaluation Process

Policy Contact:

Director of Player Development

playerdev@beaumontringette.com

Effective Date: August 2020

1. Introduction and Philosophy

The Evaluation Committee of the Beaumont Ringette Association (BRA) has compiled this document to outline the general principles behind the evaluation process. Ideally, the evaluation committee wants each player to play at the level appropriate to their skill, desire and commitment.

This document was created to provide information regarding the process, ensure clarity, and result in the greatest possible degree of fairness. The committee will strive to make the process as transparent as possible.

Evaluations require significant planning and execution, based on player numbers which often fluctuate week to week, day to day. As such, changes to the process may be required which may not be presented fully in this document, and cases may arise where deviating from this process is necessary. Final authority for what process occurs rests with the President of the BRA. Where deviations to this process occur, the president will report any deviations to the BRA board.

The Evaluation Committee will meet after the evaluations to go over the process with a mind to improve where possible. This process, then, is intended to be a living document, as the BRA strives for continually better evaluations.

It is the philosophy of BRA that every athlete be placed at an appropriate level, based on the athlete's current skill level, ringette experience, and physical maturity. Evaluations then are not tryouts but rather opportunities for athletes to showcase themselves. For this to happen, BRA will:

- create appropriate evaluation drills and measurements
- communicate the process to parents/guardians and athletes
- provide a minimum of two evaluation sessions, except as noted below for certain players assigned to Step 1
- provide feedback, when requested, to each athlete as to the decisions on their placement.

This feedback will be limited to the player's ratings only and no discussion will be entertained regarding placement of other athletes.

1.1. Committee Members and Roles

The Evaluation Committee (EC) will be made up of the following positions who all play a key role in the process:

- President – Responsible for supporting other committee members and providing guidance as needed
- Director of Player Development – Responsible for laying out the process, coordinating the evaluations, liaising with all committee members, and communicating with evaluators.
- Division Directors (Director of U10 and Director of U12-U19) – Responsible for organizing player skate groups and volunteers to facilitate scrimmages as well as tabulating results (along with at least one other member of the EC). The Division Directors are responsible for communication with players and parents.
- Director of Coach Development – Responsible for coordinating UAA sessions and organizing volunteers to facilitate UAA's and scrimmages.
- At least two other members of the BRA Board of Directors, as appointed by the President (or Vice President when the President is unavailable) to make a committee of seven.

2. BRA Evaluation Sessions

Evaluation schedules will be created by the Director of Player Development, in conjunction with the Ice Allocator. Where possible and practical, all or the majority of the evaluation sessions will take place the second weekend in September. The intent is to form the teams as early as possible while still maintaining a fair and open process.

2.1. Evaluators

BRA will use paid external evaluators for all age levels to evaluate the players during scrimmage sessions. The purpose of external evaluators is to provide an unbiased and objective assessment of the player's abilities. Depending on the number of players to evaluate there will be a minimum of 3 evaluators to a maximum of 6, the average score for all of the evaluators will be used.

Evaluators will be directed by the Director of Player Development, who will work with the entire evaluation team to establish age appropriate standards for the grading system. They will agree on what is the appropriate score for that athlete's skill level. This will then be applied to all athletes. Evaluation scores will be on a comparison basis between players on the same sheet of ice.

Evaluators will:

- give a rating in every category for any athlete assigned to them as well as a tiering number

- (overall rating compared to the group)
- be assigned to evaluate players positionally, where applicable (i.e U16/U19)
- give these results to the Division Director for compilation of results

2.2. Evaluator Independence

During the scrimmage sessions the evaluators will sit in a location away from parents and coaches. Parents and Coaches cannot have any contact with the evaluators. The Director of Player Development, or their delegate, is to act as the sole liaison between the evaluators and BRA during scrimmage sessions.

It should be noted that it is expected that evaluators WILL sit together for discussion throughout the course of the session.

2.3. Grading Sessions

For U12-U19, players will be tiered. Each grading session will consist of scrimmages. The evaluators will provide clear and unbiased feedback to the Division Director. Evaluators will use forms in Appendix A.

For U10, a similar approach will be followed with respect to grading scrimmages. **However, the grading session scores will be one of several factors used to determine what U10 Step each player is best suited to. Age, previous experience (what level played last season), physical maturity, former coach input where necessary, as well as team size are factors that will also be used when placing players. **

For U10-U14, BRA will use the UAA assessment as created by Ringette Alberta as the primary assessment tool for skating skill.

Following the UAA session (if applicable), scrimmages will be run for the remaining grading sessions. There will be volunteer coaches on each bench ensuring proper organization of shifts and balance of positional play (for U12 and U14). This will be achieved by the use of numbered pinnies or jerseys. Players will line up on the bench in numerical order and each shift for U12 and U14 will be assigned positions based on that numerical order; the first two players off the bench will be forwards, followed by a center, then two defense. In this manner, the evaluators will know what positions have been assigned to the players.

It is the opinion of the BRA that direct coaching is not appropriate during evaluated scrimmages, but encouragement can be given to the athletes. Parents may not be on the same bench as their child to avoid any appearance of favoritism.

For U16 and U19, players will be allowed to play their preferred positions during scrimmages when possible.

The overall intent of the scrimmage evaluations is to determine the rank of the athletes based on their ability to play Ringette. Every effort will be made to ensure the scrimmage teams are balanced.

The underlying intent of the evaluation sessions is to provide the EC data concerning the various players and their strengths and weaknesses.

TABLE #1 WEIGHTING OF GRADING SCORES BY AGE DIVISION

	U10	U12	U14	U16	U19
UAA SKILLS SESSION	Primary**	40%	30%	N/A	N/A
DRILL/SCRIMMAGE SESSION	Secondary**	60%	70%	100%	100%

** See above.

2.4. Universal Athlete Assessment (UAA) Session (U10-U14)

Developed by Ringette Alberta, these are repeatable, timed skill measurements which do not require Evaluators. Each skill session is designed to test a particular skating or ring handling skill specific to Ringette. Each drill will be explained (and demonstrated if needed) to the group before proceeding. Each station will be staffed by separate individuals to time and record scores.

UAA sessions will be run by coaching volunteers, and in accordance with Ringette Alberta guidelines. Because UAA's are a data collection activity and not a subjective evaluation of skills, there is little opportunity for bias. As such, it is BRA's opinion that using qualified, familiar people (i.e., previous year coaches) is beneficial to the athletes.

2.5. Individual Athlete Placement

After the completion of the UAA assessment, athletes will be assigned to an initial scrimmage group based on UAA scores for U10-U14 and based on previous year division for U16-U19.

2.6. Scrimmage Evaluation Sessions

Full scrimmage sessions will be a part of each evaluation. At the beginning of each session there will be a warmup followed by a Scrimmage. 5v5 or 3v3 scrimmages may be used at skate #1, with 5v5 scrimmages for successive skates, except at the U10 level. U10 scrimmages will use the Step 2 game format.

The purpose of the scrimmage sessions is to allow athletes to showcase their skills, positional and team play as well as spatial awareness. These are all to be done in a competitive situation. Free ring and goalie ring distributions may be used to simulate real game situations.

Players in U12 and U14 will be rotated through all positions, while players in U16-U19 will be permitted to play their preferred position when possible.

After the first scrimmage and based on scrimmage results, the paid evaluators may identify up to 10% of the top and bottom of each age group that do not require further evaluation. These players may be excluded from the second scrimmage session.

2.7. Final Skates

Final skates, if necessary, are by invitation only and will not affect the rankings used to determine protected player status from previous evaluations. The intent of the final skates is to evaluate the discretionary (i.e., 'bubble') players in an environment where they're afforded the best opportunity to compete against their competitive peers. The invitees will include

some protected players out of necessity to create a large enough group, but those players will not be evaluated and their rankings will not change.

The Evaluation Committee will have the right to remove from final skates:

- any players who, by virtue of their initial scores, place them within the mandatory selection of the team
- any players at the other end of the spectrum mathematically eliminated from making the next level.

Final skates are therefore used to aid evaluators by comparing an athlete against athletes of comparable experience and skill. Removing the players at either end of the spectrum at the final stages makes this comparison easier..

2.8. Goalies

It is the intent of BRA that part time and primary goalies be evaluated appropriately, in order to encourage all athletes who wish to be a goalie, whether on occasion or as her primary role within the team.

U10 players will only evaluate as skaters.

All athletes in 12 and U14 must participate as skaters in the UAA's. If they wish, players with an interest in goal may dress as goalies in the remaining sessions. Players who wish to be evaluated as a skater and as a goalie will be given the opportunity to do so, where possible.

3. Team Formation – U10

U10 is unique among the age divisions. Due to the large size, the three-year age span and the diversity of experience present, U10 teams will be formed using several factors, in addition to evaluation results.

- Players who will be nine (9) in the current playing year will be eligible to play Step 2 and 3
- Players who will be eight (8) in the current playing year will be eligible to play Steps 1,2 and 3
- Players who will be seven (7) in the current playing year will be eligible to play Steps 1 and 2
- Goalie play does not play a role in evaluations, as no player shall play the position full time
- Physical maturity (i.e., height) may be a minor factor when determining where a “bubble” player will be suited to develop best. It will also be used to distribute players between teams of the same Step
- First year U10 (7 and 8 years old) have little game play experience, and as such, evaluations may be limited to skating ability (UAA) only. Game play evaluations for these players have been shown to be of limited additional value.
- Returning players will be evaluated in game play situations.

3.1. Process

U10 Players will be initially organized into skating groups according to birth year and level

played last season for UAA sessions.

Following UAA scoring, players' rankings will be initially set, within the birth year limits. Skate groups may be adjusted.

At this point, most Step 1 and beginner players will be completed evaluations. There may be an additional skate if ice availability permits.

Remaining players will participate in one or two further skates with players rankings and groups adjusted as needed. The Step 2 game format will be used for scrimmage sessions.

Based on the distribution of players according to age, experience and skill level, team number per Step and team size will be determined by the EC.

Once a final ranking of players has been completed, Step 3 teams will be formed first, followed by Step 2 teams then Step 1 teams. In each case, the process noted below in Paragraph 5 will be followed.

4. Team Formation U12-U19

The number of teams at each level (A/B/C) will be determined following Ringette Alberta guidelines (RAB policy 4.4), once team size has been determined by the Evaluation Committee. Team size will be determined by dividing total number of players by the total number of teams, to arrive at approximate team sizes. C and B level teams will typically be afforded one or two additional players to help provide stability of numbers while providing opportunities for affiliation up.

At each age group, the A teams will be formed first, followed by the B teams, and then the C teams. In each case, the process noted below in Paragraph 5 will be followed.

5. Assigning Players to Teams

BRA has determined that there will be a number of protected players in each age group equal to no less than 75% of the total team size. These players are the players with the top rankings from the Evaluation Process, based on their cumulative scores. The remaining players will be selected from those whose rankings are within 125% of total team size. Specific numbers and additional details are shown in Appendix B.

The EC will meet with previous year's head coaches and assistant coaches of the bubble players to discuss the appropriate placements. No other players rankings or placement will be discussed or disclosed during this meeting, and player scoring results will not be disclosed. Subsequently, based on the discussion from the meeting and the players evaluation scores, the EC will fill the remaining roster spots.

*Notwithstanding the above, the EC may expand the bubble window to include players within 0.5 points of the lowest ranked of the 125% cutoff players.

5.1. Goalies

BRA supports the guidelines as laid out by LTAD and Ringette Alberta regarding the specialization of positions and goalies in particular. Every effort possible will be made to place goalies on teams wherein the best development for the athlete lies. Goalies in U12 should be

encouraged to play multiple positions, even if their primary position is goalie, but as noted above they may evaluate solely as goalies if desired.

Players in U10 should be discouraged from primarily playing goal until U12.

6. Miscellaneous

6.1. Missed Sessions

In our attempt to create fair evaluations and treat athletes equitably, it is our policy that all athletes should attend all evaluations (barring 6.2 below). Any athlete missing a session will not be given a score, and the remaining sessions averaged. For those athletes missing more than one session, and when those averaged scores place an athlete within the protected mandatory pick zone, the athlete will be positioned one spot outside the mandatory zone, yet within the eligible pick zone.

The rationale for this is not to punish the athlete, but to ensure that every athlete be evaluated fairly. For this to happen, they must be evaluated on different occasions. The more times an athlete is viewed the more accurate the rating.

Missed UAA sessions may be replaced by the EC with a score from the previous season.

6.2. Injured / Sick Player Missing All Evaluations

There may be circumstances which prevent an athlete from participating in evaluations. The Evaluation Committee must be made aware of this before the first skate, and a health practitioner note may be requested.

The Evaluation Committee will determine the approximate ranking of the player who has missed the session, and an asterisk will be placed beside their name. This will be done using past evaluations, coach assessments, etc.

In instances where team sizes do not allow an additional player to be taken (i.e. small teams), the OC shall approve the pick as a regular selection, if it is determined that is where the player best fits.

6.3. Age Division Movement

Playing Up means playing in a Division higher than defined for the Player's age. Normally, Levels within Divisions provide sufficient separation of skill levels. Playing Down means playing in a Division lower than defined for the Player's age. In all cases of Player movement, the needs of the Player (not the parents, not the Association, not the Teams, and not of others) must be paramount.

6.3.1. Scope

This process applies to all player movement (up or down) for all divisions/levels. Player movement is typically initiated by players or parents but in some circumstances such

moves can be requested by the association as outlined in this document.

6.3.2. Philosophy and Intent

This process is intended to deter player movement between levels outside of the Ringette Alberta divisional rules. Exceptions will be considered in rare cases and must meet the criteria outlined in this process.

6.3.3. Criteria for Player Requests to move up/stay down a Division

- a) Any player requesting to play up or play down must fill out a “Player Movement Request” form and pay the fee.
- b) The player must attend evaluations for the requested age level and should attend evaluations for their own age level in case the request to move is not granted.
- c) Should the player qualify for the next age level, registration fees for that level will need to be paid.
- d) A Player Movement Request may be denied if it would prevent a viable team to be formed at their own age level.
- e) In exceptional years, it may be necessary for BRA to move players to balance age levels and create viable teams. Should a player movement be requested by BRA, parent consent is required and there will not be a registration fee change or movement fee.
- f) Final approval for all player movement will be the decision of the Evaluation Committee.
- g) All documents must be received by the Director of Player Development for the age level requested, no later than the first Executive meeting in September.
- h) BRA may wish to move players up a level to balance the numbers on the teams. If BRA wishes to move a player up, a list of the players whose parents have indicated they would not be opposed to such a move will be considered. All players wishing to move up will be invited to attend an evaluation session for the higher level. BRA can consider factors such as skill level, player maturity, family considerations, etc. in deciding who to ask to move up.

6.4. Appeals

Team selection is final and a player’s placement may not be appealed.

7. Policy History

Approval Date	Policy Version	Revision Description
17 Aug 2020	0.0	New Process

APPENDIX A: Evaluation forms

Beaumont Evaluation Sign-in Sheet

[illegible]
