Black Gold League
Scheduler's Reports
2018-19

Specific of ice were discussed during regular member meeting and will not be reviewed

1. Ice analysis for Session 1 and 2 were discussed at the November 21, 2018 meeting

2. Had a few complaints about U10 games being played on weekdays. Membership needs to make changes to policy if they are not happy with this.

3. FMC and HIN – it is difficult to set these games so concerning when teams with lots of notice reschedule these games, using one of their reschedules, for a tournament

4. For FMC – Session 1 try to send teams that have matching teams so they can travel in pairs (for bussing). This may end up with some associations sending more teams to FMC then others. For 2019-20 – will not use this as a priority in assigning teams to FMC

5. Questions came up about Red Deer/Lacombe having to travel to FMC. FMC to Red Deer/Lacombe and vice versa go against the time policy (leave community and return to community). Need to decide to amend policy or not have these teams travel to each other's home arenas

6. NRL – went pretty good. Rush go their own ice when they saw it was getting difficult to get an association to step up

7. U10 Wind Up – had some difficulty getting a host for the last three pools and had an incident with S3. Need a discussion about whether to continue

8. Games during repooling/Session 2 Got mixed reactions from teams about whether or nto they like it
