Background

For more than six seasons, Hockey Edmonton and the Elite Committee have been seeking a solution to the inequitable draw zones / player registrations that have hampered clubs from operating the same number of teams in each division and category of play as well as impacting competitiveness given inequities in terms of size of player pools.

In addition to the requirement to contract from four to three Midget AAA teams, the Hockey Alberta Male ADM decision of February 9, 2018 required that Hockey Edmonton must develop an:

- improved internal boundary system such that the registered number of players are relatively balanced to help ensure that the organizations in Hockey Edmonton are created in a way to achieve competitive balance
- appropriate feeder systems to support the Midget AAA program in line with the other Elite Draw Zones across Alberta. This may require adjustments to numbers of teams at other levels to fit the feeder system

Process / Rationale

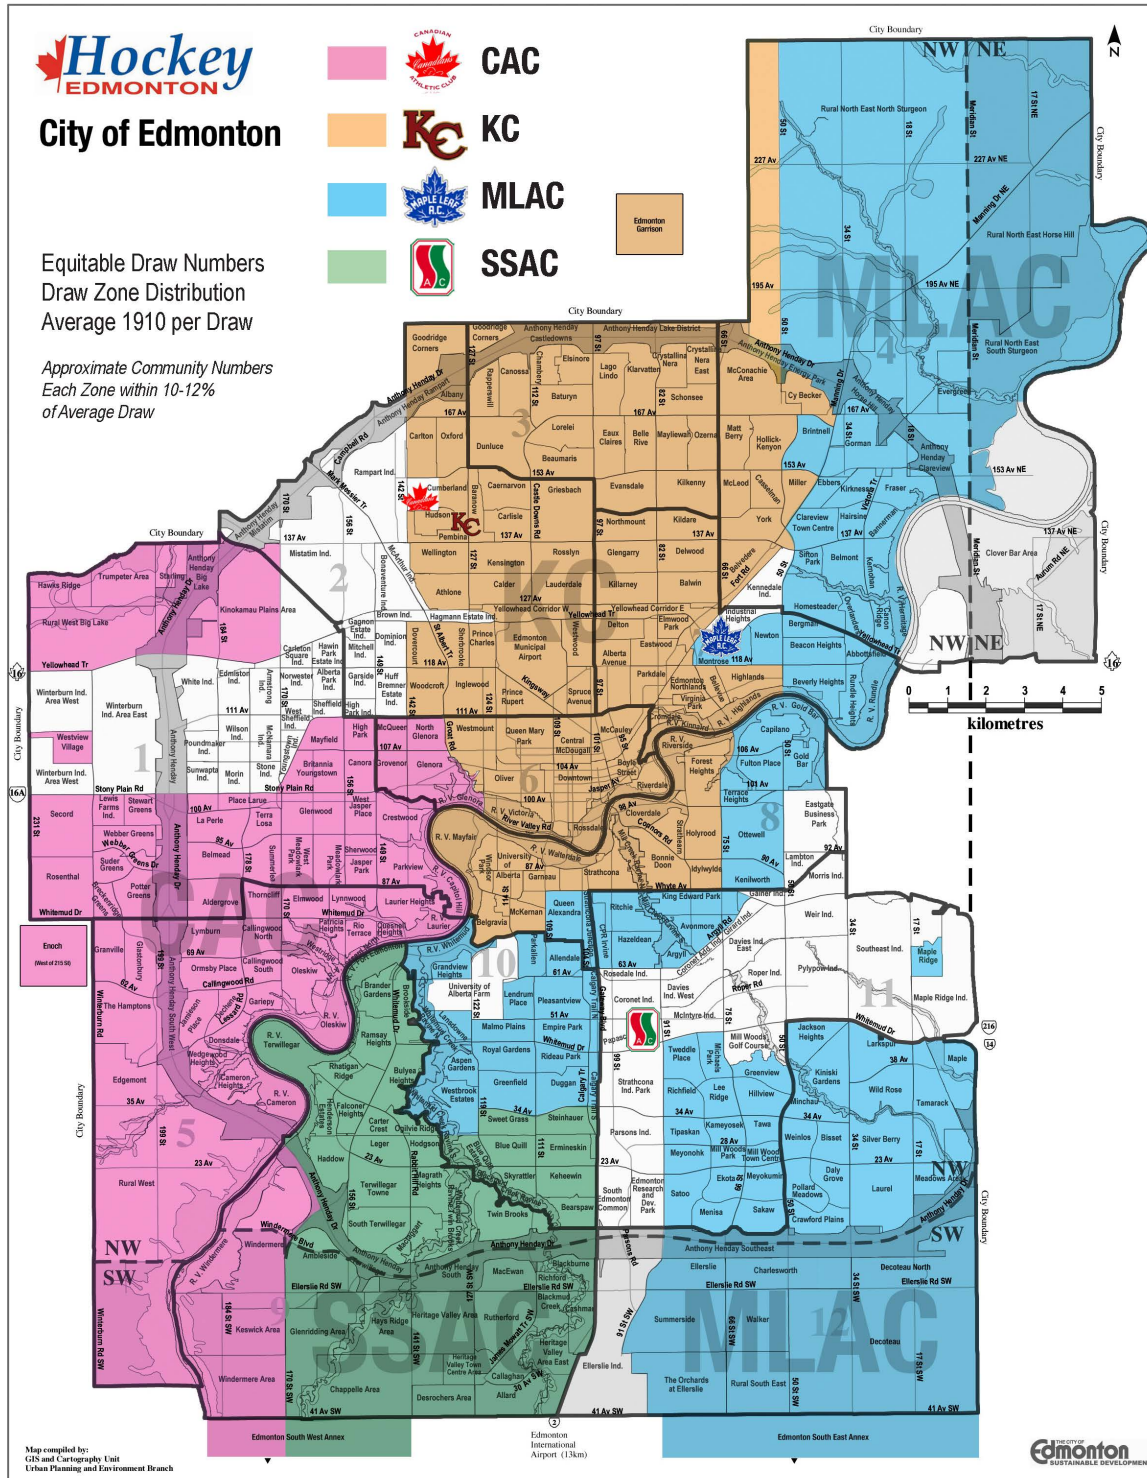

Drawing upon the learnings of two previous committees charged with elite committee boundary review and some new concepts, the Elite Hockey Management Committee determined the best option to move forward was to base boundaries on of City of Edmonton Communities / Neighborhoods use as portrayed in the City of Edmonton Wards maps.

Establishment of four distinct elite draw zones each with contiguous boundaries was paramount. Total male registration numbers as well as male registration numbers for athletes in Atom through Midget Tiers 3 and above were key parameters considered that will allow formation of equitable draw zones for elite hockey and position the committee and clubs to tackle the final requirement of improving the feeder system

Implementation

These changes will come into effect for the 2020-21 Hockey Season.

There is a work needed within HCR to ensure readiness for the 2020-21 season and our four elite registrars have started to meet and plan strategy and process

Information sessions will be held to facilitate these changes.
