

To the CMBA Officials

A lot has happened for CMBA, our officials, and our sport in general over the last five years. However, one thing has only grown as a priority, and that is the development and support of the officials in our league.

Whether it is the continued growth and support of our White Whistle officials program, the new addition of our Referee Coaches model, or more protection for our officials through improved SCC standards and practices, it has been the priority of our board to ensure that we develop and build our officials to the best of our ability.

Moving forward into the 2023-2024 season, we look forward to continuing to support our officials as much as we can in order to grow the game of basketball in our community.

In addition to our new Referee Coach model, we are currently developing a digital training program for officials that we look forward to rolling out in 2024.

Most importantly, we are fortunate to have some great leaders within the ranks of our officials. I want to extend a thank you to Brock, Danny, and David as they continue to support and develop our group.

I look forward to another exciting year and encourage your feedback always.

I sincerely thank you, and appreciate all that you do.

Carey Blaskin
