

Game Day & Home Team Responsibilities Guidelines

2023 Season

The goal of the CDMFA programing is to provide a positive, safe and professional feeling experience for all participants. Game-day preparation for all coaches and players is a key part of making the game day feel important to the football experience.

As indicated in the house rules for the specific age levels there are specific equipment requirements that all head coaches, team managers and their associations should be aware of and adhered to.

This resource is intended to be a summary for quick consultation. It does not supersede nor does it replace the house rules for each age group. It is a living document that will change and adjust to fill knowledge gaps or clarify for coaches as questions arise.

General Considerations for the home team:

- The home team as specified in the CDMFA schedule is responsible to have the goal posts
 padded(should be done by facility as all our booked facilities have these set up already, but
 home team is responsible to double check them), the Field marked appropriately (with lines
 or cones depending on the context), and supply the appropriate sized Game Ball to start the
 game.
 - a.) 9/Side field dimensions are 110 yards long (full field length) x 50 yards wide, endzones are full depth of 20 yards x 50 yards wide (requires roughly 65 cones to line field for 9/Side game)

- 2. The home team is also responsible to provide Downs Box and Stick Chains (supplied at all CDMFA booked facilities) and provide the people to serve as the Stick Crew(3 volunteers will be required for the Stick Crew) and 1 game timer (when required). ** This may change in the playoffs when neutral stick crews and timers may be contracted by the CDMFA (please pay attention to league directives in those situations).
- 3. IF the game field comes with a Public Address system, the Home Team may provide a PA Announcer provided they are properly instructed for the job (i.e. no personal commentary or "homer" type announcements designed to demean or insult the opposing team).
- 4. The Home Team is also required to have the field appropriately prepared for football and provide for lights, dressing rooms and snow removal as required. Typically done by all our facility staff at CDMFA booked sites.
- 5. The Head Coach, Manager, or Trainer for the home team should communicate the key elements of the team Emergency Action Plan with their counterpart. This is best communicated with the charge person for each EAP to be aware of any specific information that could be required.
- 6. The Head Coach or manager for each team is required to exchange game day rosters with the opposing team prior to each game. The roster must be in numerical order, with proper numbers updated for every game, and any players not playing in that game must be crossed off the roster indicating they are not in the line up
- 7. POST GAME The HOME TEAM is responsible to report the score of the completed game within 24 hours via the link on the CDMFA site. This process also includes updating both teams game day rosters in RAMP. The VISITING TEAM will then have 24 hrs have the time the home team enters the score and rosters to verify the game.
