

Relay Race

- Racers start at one end lined up in even numbers, (if uneven first racer will need to go a second time). Pylons to be placed in line with the top of the circles for start line.
- Use bumper pads to create chutes at centre ice and coaches to hold sticks for racers to slide on bellies underneath
- Pylons to be placed at opposite end from start line in line with faceoff dots. Racers to curl around pylons and sprint back to the start line. Once past the start line the next racer goes.
