Install HiSports

9 months ago · Updated

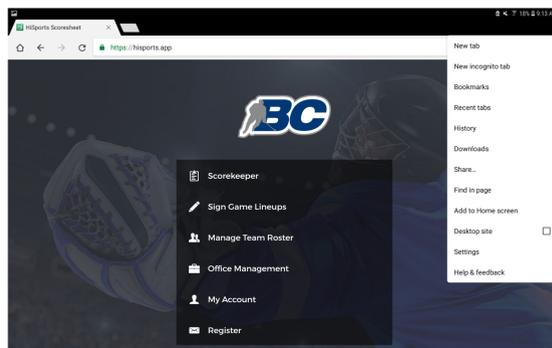

The HiSports Scoresheet app can be installed on both Android and iOS directly from your browser.

No need to install from the app store and wait for updates, as it's always up to date and doesn't use any extra data.

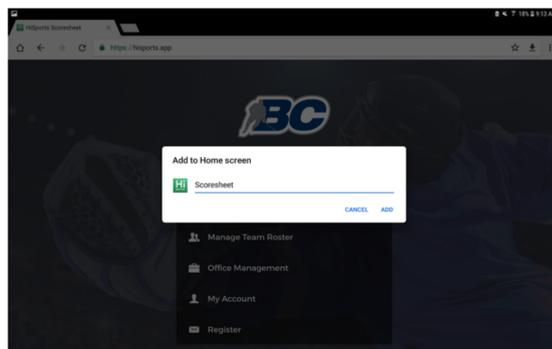

Note: This is not necessary to use HiSports. You can continue directly in the browser if desired.

Android

First, open hisports.app in Chrome, then tap the three dot menu next to the address bar.

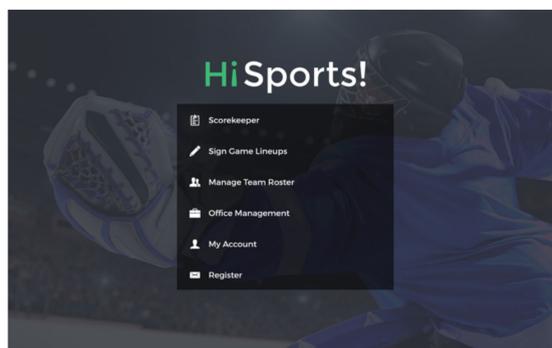

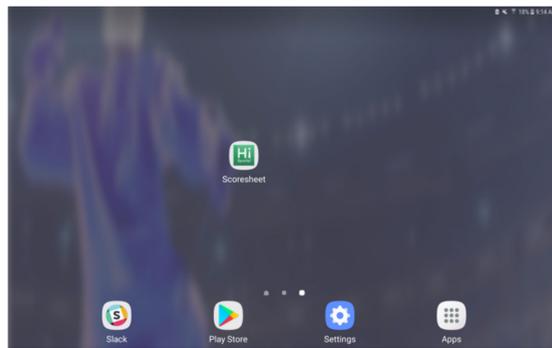

Tap **Add to Home screen**:

Finally, tap **Add**.

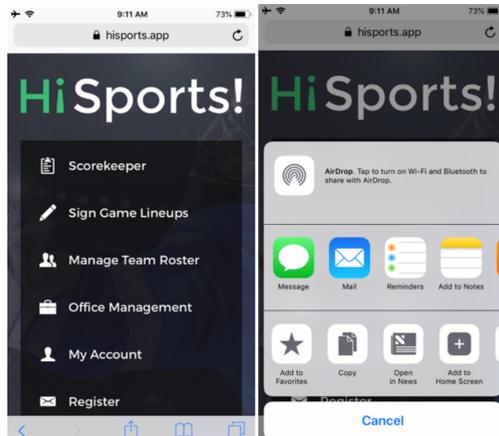

The Scoresheet app will now be installed to your phone, and opens in full screen.

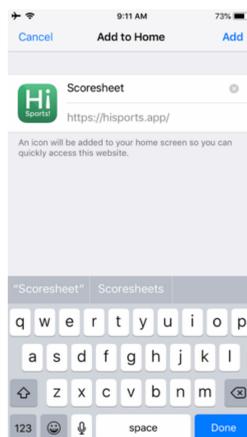

iOS

First, open hisports.app in Safari, then tap the **Send** button in the middle of the bottom row.

Tap **Add to Home Screen**. You may need to scroll over the last row to the right.

Finally, tap **Add**.

The Scoresheet app will now be installed to your phone and opens in full screen.
