FCR Adult League – Statistics Tracking

Introduction

Statistics tracking is provided by FCR as a service which hopefully increases enjoyment of the game for all members. There are numerous stakeholders involved who work together to make the service a success. Important resources include:

- FCR Office Staff who control Goalline;
- FCR Staff and Volunteers who perform data entry;
- Regina Soccer Referee Association members who are responsible for properly completing game sheets;
- Team managers who need to keep their rosters accurately updated in Goalline.

The goal of stats tracking is to have an accurate picture of all goal scorers, as well as yellow and red card recipients. The long-term goal for 2019 Outdoor is to offer prizes and acknowledgement to members who excel in the goal-scoring category.

Only players officially registered on a team will have their stats tracked. No Guest Player or Permit Player stats will be tracked for any game.

The 2018-19 Adult Indoor Playoffs were a trial period for stats tracking to begin. The process worked smoothly, and the initiative is being continued for the Outdoor 2019 season. If any gaps in the process occur for outdoor, remedies will be explored.

Process

Stats tracking follows these steps:

1. Managers complete their rosters in Goalline with correct jersey numbers;
2. Managers use Goalline to print out accurate game sheets;
3. RSRA Referees do pre-game checks to make certain all numbers match with team jerseys;
4. During the game, RSRA Referees accurately record the jersey numbers of goal scorers, as well as yellow and red card recipients;
5. RSRA Referees accurately write the correct information onto the game sheet at the end of the game, clearly indicating the individual stats;
6. Managers check with referees immediately after the game to make sure the game sheet is correct;
7. Referees send in the completed game sheet to the FCR office;
8. FCR Staff or volunteers manually update the stats spreadsheet in Goalline with all individual stats for all members to see.

FCR Adult League – Statistics Tracking

Guidelines

Stats that are Tracked

1. Goals
2. Yellow Cards
3. Red Cards

Stats that aren't Tracked

1. Assists
2. Shots
3. Saves
4. Goalkeeper Shutouts
5. Any guest or permit player stats

Corrections

Because of the high volume of statistics being tracked, no corrections or appeals are heard for any of the numbers received by FCR office staff. All inquiries about who was or was not awarded a goal should be made to the referee immediately following the game. Once the game sheet arrives at the office, that is the final record of the match, and only that information is used for the online statistics.

Updating Schedule

FCR will try to update the statistics at least once per week. Stats updates will occur as often as time allows for FCR Office staff, with the understanding that some weeks during the season are much busier than others.
