- b. The most recent FIH regulations for General Outdoor Events (March 2019) will be used in cases not covered in these regulations.
- c. The FHC Code of Conduct will apply to, and must be signed by, all participants including team staff and officials.

2. | PARTICIPANTS

- a. The official Team Party determines who may sit on the team bench, and shall consist of not more than 16 eligible players, plus 3 team officials; up to 5 if a team has both a therapist (athletic or physio) and a medical doctor, or 4 if only one medical professional. National Teams participating in the event may consist of not more than 18 eligible players. Those eligible to sit on the team's bench during a match must be listed on the Team Entry form (see Section 4 b).
- b. Team Officials
 - i. **Team Manager** – every participating team must have a single Team Manager for the duration of the Tournament who must be a **NON-PLAYING** member of the official Team Party;
 - ii. **Team Coach** – may be a player, if eligible, although teams are encouraged to have a non-playing Coach.
 - iii. **Assistant Coach**
 - iv. **Physiotherapist or Athletic Therapist (qualified) (if any)**
 - v. **Medical Doctor (qualified) (if any)**

If a Team has more officials than allowed in the Team Party, these extra individuals may, at the discretion of the Tournament Director, be designated as non-bench members of the Team. If so designated at the Technical Briefing meeting, they are still under the jurisdiction of the Tournament Director and may take part in warm-up, but must leave the field of play and team bench area before a match can begin.

- c. All participants must be current members of FHC and in good standing, or if representing foreign teams must be current members of their National Association and in good standing.

This regulation does not apply to registered team doctors or physio/athletic therapists, who may act in that capacity for any number of teams.

APPENDIX 3 | GUIDELINES FOR GOALKEEPING PRIVILEGES & SUBSTITUTION

These guidelines provide interpretation of goalkeeping roles and substitution.

A mandatory experiment is introduced with effect from 1 January 2019 taking out the option for teams to play with a Field Player with Goalkeeping Privileges. Teams now have only two options.

Each team may play with:

- a goalkeeper wearing a different colour shirt and protective equipment comprising at least headgear, leg guards and kickers; this player is referred to in these Rules as a goalkeeper; or
- Only field players; no player has goalkeeping privileges or wears a different colour shirt; no player may wear protective headgear except a face mask when defending a penalty corner or a penalty stroke; all team players wear the same colour shirt.
- **Any change between these options must take place as a substitution.**

Time is stopped only for substitution of a goalkeeper but not for other substitutions.

- Time is stopped briefly to permit a goalkeeper to take part in a substitution. The time stoppage is not extended for a player to put on or take off protective equipment as part of a substitution including following a goalkeeper injury or suspension.

Goalkeeper Wearing Full Protective Equipment:

- must wear a shirt different in colour to other players throughout the time they are on the pitch.
- may enter or leave the field for substitution purposes near the goal they are defending.
- must wear the protective equipment at all times - except that the headgear and any hand protectors may be removed when taking (but not when defending) a penalty stroke.
- has full goalkeeping privileges as defined in the [Rules of Hockey](#).
- must not take part in the match outside the 23 metres area they are defending (except when taking a penalty stroke).

Field Player:

- wears a shirt of the same colour as teammates throughout the time they are on the pitch.
- must leave or enter the field for substitution purposes within 3 metres of the centre-line on the specified side of the field.
- may choose to wear a face mask (but no other protective equipment) when defending a penalty corner or penalty stroke.
- does not have any goalkeeping privileges.

Injury or Suspension at a Penalty Corner or Penalty Stroke

At a penalty corner:

- An injured or suspended goalkeeper wearing full protective equipment may only be substituted by another goalkeeper wearing full protective equipment – otherwise, the penalty corner is defended by the field players already on the pitch.
- No substitution is permitted for an injured or suspended field player – the penalty corner is defended by the field players already on the pitch.

Any form of substitution may take place at a penalty stroke.

APPENDIX 5 | FIELD HOCKEY CANADA CONCUSSION MANAGEMENT PROTOCOL

The following is an excerpt from the Field Hockey Canada Concussion Management Protocol. The full document, and associated information, may be accessed at www.fieldhockey.ca/athlete-documents/

1. Head Injury Recognition

A concussion should be suspected:

- ☒ In any athlete who sustains a significant impact to the head, face, neck, or body and demonstrates ANY of the visual signs of a suspected concussion, or reports ANY symptoms of a suspected concussion as detailed in the **Concussion Recognition Tool 5**.
- ☒ If a player reports ANY concussion symptoms to one of their peers, parents, teachers, or coaches, or if anyone witnesses an athlete exhibiting any of the visual signs of concussion.

Concussion Red Flags:

If an athlete exhibits or reports any of the following, call an ambulance for emergency medical assessment.

- ☒ Neck pain or tenderness
- ☒ Severe or increasing headache
- ☒ Deteriorating conscious state
- ☒ Double vision
- ☒ Seizure or convulsion
- ☒ Loss of consciousness

2. On Field Management

Basic First Aid

- ☒ DRSABCD
- ☒ Cervical Spine Precautions
- ☒ Call emergency services if indicated

If an athlete is suspected of sustaining a more severe head or spine injury during a game or practice, an ambulance should be called immediately to transfer the patient to the nearest emergency department for further Medical Assessment.

Coaches, parents, trainers and officials should not make any effort to remove equipment or move the athlete until an ambulance has arrived, and the athlete should not be left alone until the ambulance arrives. After the emergency medical services staff has completed the Emergency Medical Assessment, the athlete should be transferred to the nearest hospital for Medical Assessment.

In the case of youth (under 18 years of age), the athlete's parents should be contacted immediately to inform them of the athlete's injury. For athletes over 18 years of age, their emergency contact person should be contacted if one has been provided.

Sideline Medical Assessment

If an athlete is suspected of sustaining a concussion and there is no concern for a more serious head or spine injury, the player should be immediately removed from the field of play.

Scenario 1: If a licensed healthcare professional is present

The athlete should be taken to a quiet area and undergo Sideline Medical Assessment using the Sport Concussion Assessment Tool 5 (SCAT5) or the Child SCAT5. The SCAT5 and the Child SCAT5 are clinical tools that should only be used by a licensed healthcare professional that has experience using these tools. It is important to note that the results of SCAT5 and Child SCAT5 testing can be normal in the setting of acute concussion. As such, these tools can be used by licensed healthcare professionals to document initial neurological status but should not be used to make sideline return-to-sport decisions in youth athletes. **Any youth athlete who is suspected of having sustained a concussion must not return to the game or practice and must be referred for Medical Assessment.**

In the case of national team-affiliated athletes (age 18 years and older), an experienced certified athletic therapist, physiotherapist or medical doctor providing medical coverage for the sporting event may make the determination that a concussion has not occurred based on the results of the SCAT5. In these cases, the athlete may be returned to the practice or game without a *Medical Clearance Letter*, but this should be clearly communicated to the coaching staff. Players that have been cleared to return to games or practices should be monitored for delayed symptoms. **If a concussion is suspected, or a player develops any delayed symptoms, the athlete should be removed from play and undergo medical assessment by a medical doctor or nurse practitioner.**

Scenario 2: If there is no licensed healthcare professional present

The athlete should be referred immediately for medical assessment by a medical doctor or nurse practitioner, and the athlete must not return to play until receiving medical clearance.

3. Medical Assessment

The medical assessment will determine whether the athlete is diagnosed with a concussion or not, and may be completed by a medical doctor or nurse practitioner. Athletes with a diagnosed concussion should be provided with a *Medical Assessment Letter* indicating a concussion has been diagnosed. Athletes that are determined to have not sustained a concussion should be provided with a *Medical Assessment Letter* indicating a concussion has not been diagnosed and the athlete can return to school, work and sports activities without restriction.
