

# Development

## House League

With current restrictions on available ice to the associations, it will be difficult to plan steady development sessions for the teams. We do however plan to provide Development sessions for teams U13 and below.

### How will this happen?

- We plan to use leftover ice and any ice than we can find to purchase through the season to offer development. It is not certain as to the amount of sessions that will be offered with the uncertainties surrounding ice availability.
- Teams will be grouped together by age/ team.
- GCGH is committed to funding all HL development sessions that we organize.
- Development sessions are mandatory for the teams and coaching staff.

## Competitive

With a compressed schedule and ice availability teams will not be scheduled regular development. We will be assigning teams with a development provider.

Teams at U13 and below are all strongly encouraged to complete a number of development sessions with their teams. An ideal number to aim for a competitive team would be 10-shared sessions

### What you need you to do?

- Group together with a team of similar skill
- Reach out to Dave Martin or John Bower to discuss your schedule and be given a provider to use
- Together we will create a development plan for your team
- Budget the cost of the ice and the cost of the provider
- Ice will be used from your allocation or extra purchased ice

If teams at U15 and up, HL or Comp, are interested in having a development provider, we can assist with finding you one.
