

Roy Lafleur **Director at Large - Risk and Safety**

With over three seasons of minor hockey leadership experience, I have served in Assistant Coach, Head Coach, and Trainer roles with the Kanata Minor Hockey Association, as well as in Assistant Coach and Trainer capacities with the Kanata Girls Hockey Association. Combined with a lifetime of playing experience and continued active involvement in the game, I bring a strong understanding of player development, team culture, coaching support, and the overall athlete and family experience.

Professionally, I hold an Honours certification in Occupational Safety and Health from Algonquin College and have built my career in municipal health and safety, where leadership, risk management, policy development, and continuous improvement are central to my role. This experience brings added value at the director level through a strong focus on safe sport environments, volunteer and player wellbeing, incident prevention, clear communication, and strengthening organizational processes.

I am passionate about supporting KMHA's core values through strong leadership, a player-first mindset, and a commitment to fostering a positive, safe, and development-focused hockey environment for players, families, and coaches across the association.
