

Lakeland Winter Weather Policy

Teams will not be expected to travel for the following reasons:

1. The static temperature is -40 degrees Celsius or lower.
2. The windchill factor is -40 degrees Celsius or lower.
3. A travel advisory has been issued for the Lakeland area by Environment Canada.
4. AMA Road Reports show completely snow-covered highways (road will be highlighted in red).

The Executive Director or an appointed board member will monitor the forecast and road conditions and notify the teams scheduled to play by 9:00 pm the night before scheduled games. If the forecast is close to -40 degrees Celsius, the Executive Director or an appointed board member will notify the travelling teams of cancellation 3 hours before game commencement.
