# QR Code for Injury / Incident Tracking Form

## This online form is the primary means of reporting Injuries or Incidents that occur during a game or practice

**How to scan a QR Code**

1. Open the Camera App on your phone's home screen, control center, or lock screen

2. When the Camera App starts, make sure the REAR Camera is selected.

3. Hold your phone so that the QR CODE appears on the screen in the Camera App.

4. When a notification automatically pop's up on your screen, tap the notification and the phone will open the internet link connected to the online form for you to complete and submit.
