

Ramp Game Sheet Cheat Sheet

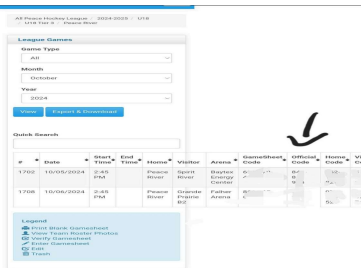

- Ramp Gamesheets and Ramp Team accounts are the same
- TeamCode needs to be entered into the Ramp Gamesheet Front screen, it will ask for your teamcode once entered it will automatically upload games

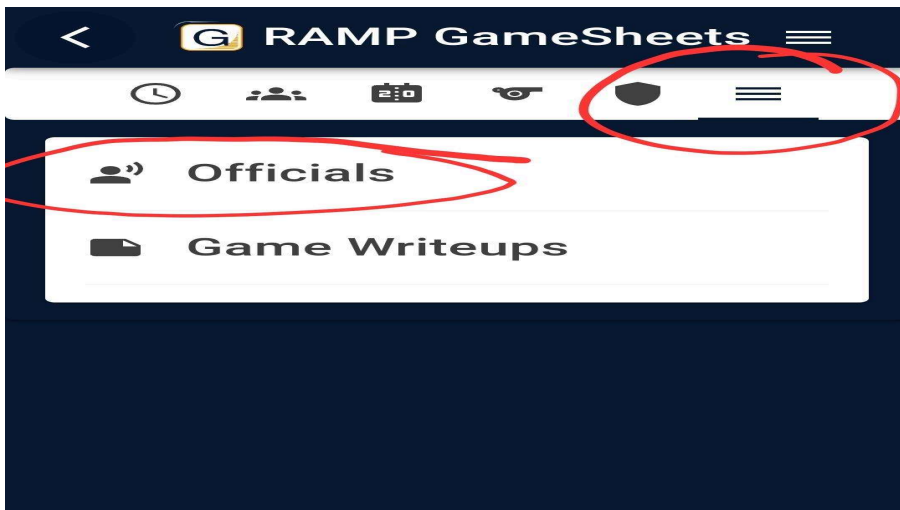

- You will receive a game code for home and away games as well as gamesheet code to update and have access to officials information and game sheet. These codes will be located on your Ramp interactive admin under League games and will be available prior to your games.

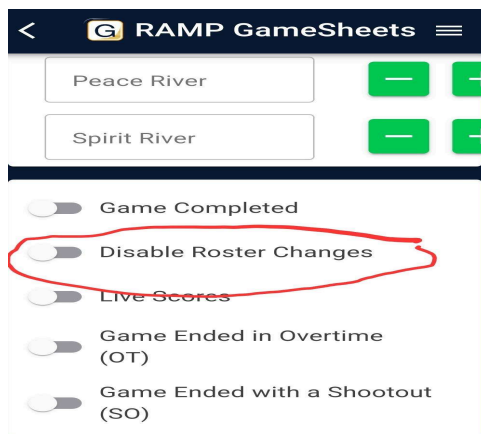

- Your Head coach requires the home or away codes to update on ice roster and bench staff
- You will also need to give your refs their Officials code for the game in order to start the game as well to have them sign off on the game sheet and input any incident reports.

- I strongly recommend teams to have a stopwatch or timer as you will need to input actual ice time
- Who ever is running your gamesheet will also need to add staff to the game sheet ie: clock and gamesheet

- Once both teams and officials have input their rosters and they have counted players (ref's usually do not bring their cellphones on the ice, make sure you have your device handy for the refs to use to do a head count)and signed off you will need to lock the rosters ... no Changes to ANYONE'S roster is allowed once the officials have

signed off.

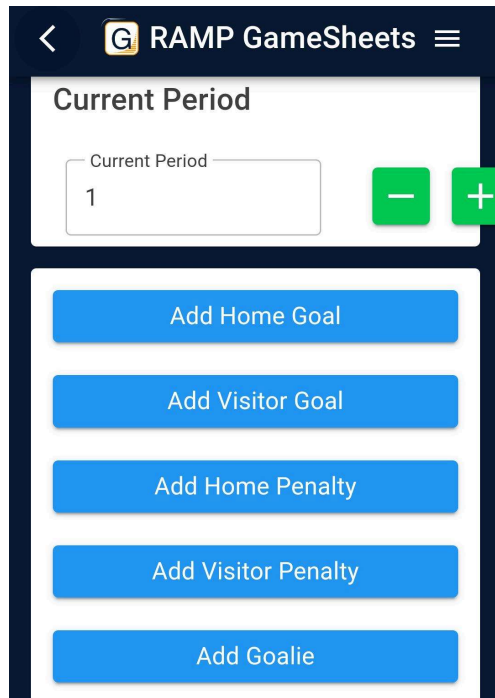

- Remember once the puck is dropped the very first time in the period to start the stopwatch or timer and you stop it once the buzzer goes at the end of each period. After each period you will add in your actual ice playing time.

Period Length in Minutes

1st 2nd 3rd 4th+

- Always make sure you change the current period. If you do not your times for goals and penalties will not line up and your Egamesheet will be wrong
- Once a goal is scored you will need to add new goal into game sheet right on the front of the game information is the easiest way to enter goals and penalties

To enter Goals
Here is Home Goal and Away Goal

Spirit River

- This is where you enter the Power Plays chances

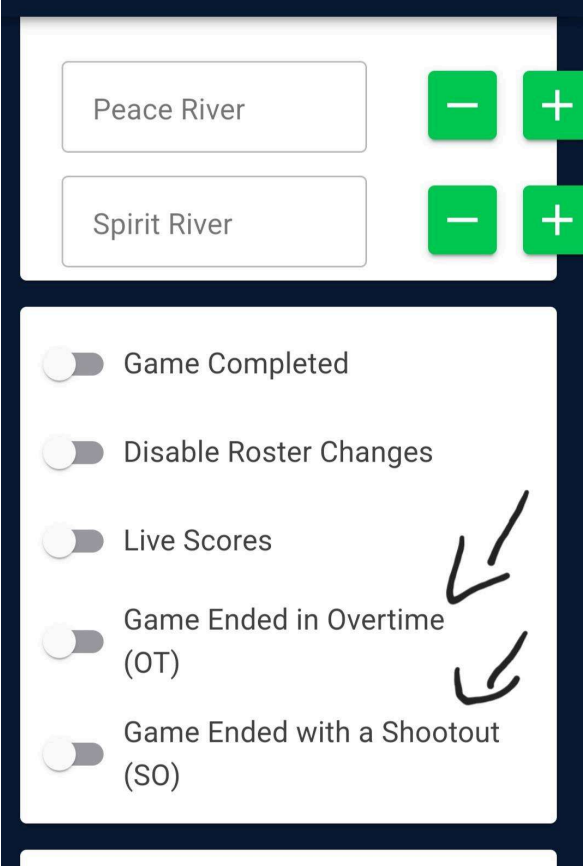

If Timeouts are used here is where you enter it.

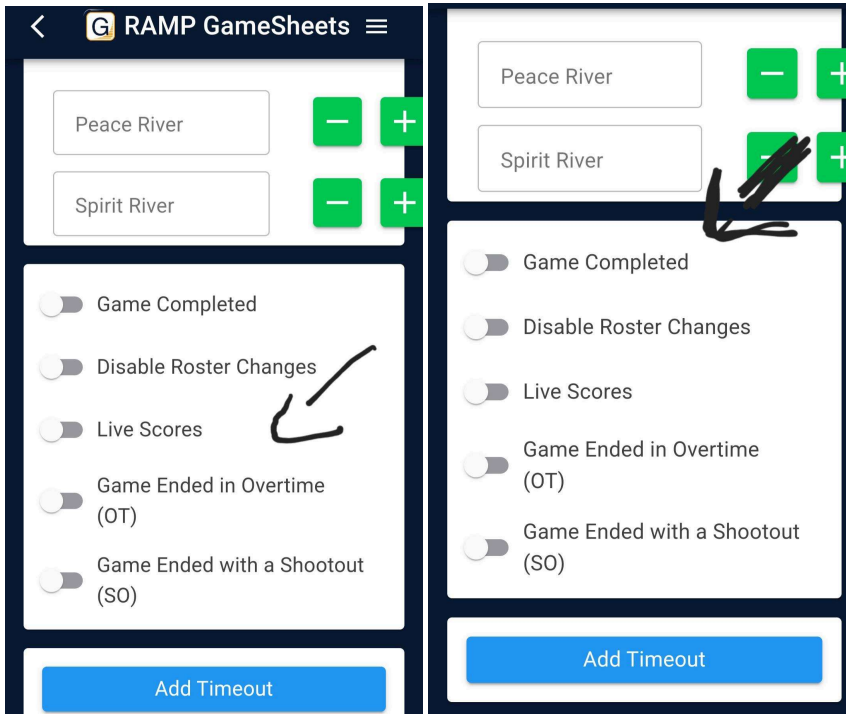

If your game has gone in to overtime make sure you have clicked off Game ended in Overtime

Or if your game ended in a Shootout make you you click Game ended in a shootout

Once the game is over and everything is correct and everyone has signed off on the game including coaches, refs, gamesheet person
You can now complete your gamesheet but make sure you have review everything prior to clicking complete

Aswell once you are comfortable you can also during your games click live score and this will make every input you do live on APHL website so people at home or where can see the update gamesheet as the game is happening

You are now done with your gamesheet
I hope this helps and good luck with your season and your Egamesheets
