Shots on net – Normally the penalty box volunteer is responsible to keep track.

GOALIE STATS

U11 and up.

Shots for goalies are compared to goals for players, so please educate your volunteers to do their best to keep accurate records for every player on the ice.

A shot on goal is any shot that enters the net or any shot that would normally have entered the net if not stopped by the goalie. Shots that deflect off the posts or crossbar and stay out of the net are not counted as shots on goal. The number of shots and whether a shot puck counts as a shot is determined by the person running the clock only. Shots cannot be changed on the scoresheet.

A shot on goal is " A shot that would enter the net if there was no goalie", this would include the goals that were scored. The RAMP website asks for GA (Goals against) and Shots. With the new changes to the gamesheets and the RAMP website require the same information.
