WORKING TOGETHER FOR THE FUTURE OF WOMEN AND GIRLS IN THE GAME

LAND ACKNOWLEDGMENT

It is important for us to remember that long before our community was here there were thriving peoples, cultures and traditions on this same land. These cultures tried very hard to teach us how to steward our land, water and air. Unfortunately, we did a terrible job at listening to their wisdom and our environment is now paying that price. Even worse, we have not acknowledged that our communities are literally built on top of these strong cultures. We cannot hide from the social, emotional and economic damage this has done to generations of families across Canada. It is important for us to recognize that the strength of our community today comes from those who were here before us. It is also our responsibility to remind future leaders they are a part of a continuum of leadership that started with Indigenous culture. Finally, each of us needs to remember that truth has to come before reconciliation.
