

POWER CHAIR

SOCCER

What is Power Chair Soccer?

- Power Chair Soccer is played on a standard sized basketball court. Each team is allowed 4 players on the court at a time, all of whom use an electric wheelchair to move themselves and the ball around the pitch. Guards are attached to the chairs to allow the ball to be hit around the court.
- A match consists of 2 20-minute periods. The sport uses an oversized soccer ball. The diameter of the ball is 13", and weighs over 2lb - much heavier than a conventional soccer ball in order to stop the ball from leaving the ground during play.
