

## **Frequently Asked Questions- Updated October 7, 2020**

### **1. What do I do if my child tests positive for COVID-19?**

Keep your child home and out of the hockey environment. It is also important to communicate with your physician and public health authority, ensuring you follow the steps identified.

### **2. What if a parent/family member tests positive for COVID-19? What protocols do we follow?**

If a parent or family member tests positive for COVID-19, the player and their family will need to stay out of the hockey environment. They should contact their physician and public health authority for instructions. The player will need a note from their physician or public health authority to return to play.

### **3. If someone on my child's team tests positive for COVID-19, will the team be allowed to continue to play hockey?**

If someone on your child's team tests positive, public health authority guidelines will determine contact tracing and isolation requirements. It is possible, therefore, that one diagnosis on a team could lead to that team being required to pause hockey activities until the public health authority determines it is safe to return.

### **4. What if my child is sick but does not have COVID-19?**

The player should follow up with their physician and the public health line. They will require a note from their physician to return to play.

### **5. What should I do if my child is exhibiting signs of COVID-19 but has not been tested?**

The player should remain out of the hockey environment and contact their physician or public health authority for required steps to be taken. The player will require a note from their physician or public health authority to return to play.
