

RAMP Team App

St.Marys Ringette will be using RAMP Team App for contact tracing this season. If you are familiar with the App, please share your knowledge with others. If you are new to RAMP Teams here is some information to get you started.

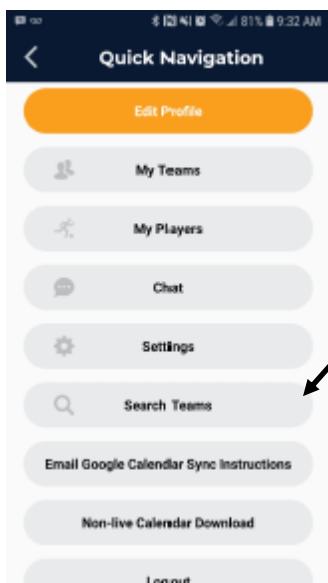

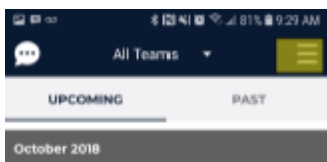

Coaches and players will receive an email announcing that their team is on the App. They will follow the instructions to add the team to their RAMP Team App account. If coach/player/parent already has an account, the email must be what they have their account under in order to automatically link to their RAMP Team App account.

If players/coaches/parents who are invited to the team already have an account (and the email address matches the email address from the roster invite) they do not need to do anything. The team will now appear in their Team App.

Players/Parents Coaches who DO NOT have RAMP Team App Account Follow the instruction in the email to download the App and Create an Account.

To add additional parents, or have multiple accounts for their players:

Click on the Hamburger Menu to view more navigation
Choose Search Teams

- Teams can be searched by either the Organization or by team name

Please note that parents will need to be "Approved" by the team's Coach/Manager

Team Coaches/managers will have additional access to the App to set up their team details.
